

IBS America develops integrated compliance management solutions to help companies improve corporate governance and achieve sustained adherence to regulations and standards. Since 1982, we have delivered our systems and services to thousands of companies worldwide. IBS America is one of the very few compliance software companies certified to ISO 9001.

CLIENT/SERVER-BASED COMPLIANCE MANAGEMENT SOFTWARE

Compliance Solutions with Integrated Collaboration

QSi System is a family of integrated solutions for compliance and quality management. Our QSi System products are designed to help enterprises achieve and maintain compliance with specific industry standards, out-of-the-box. Easy to administer and proven in more than 1,200 deployments worldwide, these solutions provide secure document repositories, a rich workflow and approval engine, and alert, alarm, and escalation notifications of important deadlines.

The QSi System application server also provides integrated security, email, calendaring and scheduling, and optional real-time chat. Client software provides a rich user experience while web browser access is also available to both internal users and to external users such as customers and suppliers. In use by companies with hundreds of locations and thousands of users, QSi System solutions are also ideal for small companies who will need only a single, low-cost server. All QSi System products help your organization rapidly reap the benefits of ISO certification - including improved customer satisfaction and reduced costs - at a price any company can afford. QSi System solutions are also available as a hosted service.

QSi System for Quality Management (ISO 9001:2000)

Lets you create an integrated, seamless, and paper-free Quality Management System across the enterprise for managing every aspect of ISO 9001:2000 compliance. Its core functions include:

- Document Control
- Specification Control
- CAPA (CARs, PARs, SCARs)
- Internal and Supplier Assessments
- Calibration
- Change Management
- Customer Management
- Supplier Management
- Employee Training
- Nonconformances
- Management Reviews
- Design Process Management
- Inspection and Testing

QSi System for Automotive Management (ISO/TS 16949:2002)

Designed specifically to meet ISO quality management requirements for the automotive industry. In addition to the core functionality found in the QSi System for Quality Management, the following functions are also included:

- Contingency Plans
- Transportation Carrier Performance
- Auto Process Change Management
- Gage R&R
- APQP
- FMEA
- PPAP
- Business Plan
- Customer Survey

QSi System for Environmental Management (ISO 14000)

QSi System for Environmental Management enables you to realize the benefits of the ISO 14000 standard. In addition to the core functionality found in the QSi System for Quality Management,

the following functions are also included:

- Emergency Preparedness
- EMS Aspects and Impacts
- EMS Targets and Objectives
- Legal Register
- MSDS/HAZMAT
- EMS Monitoring
- EMS Policy Manual

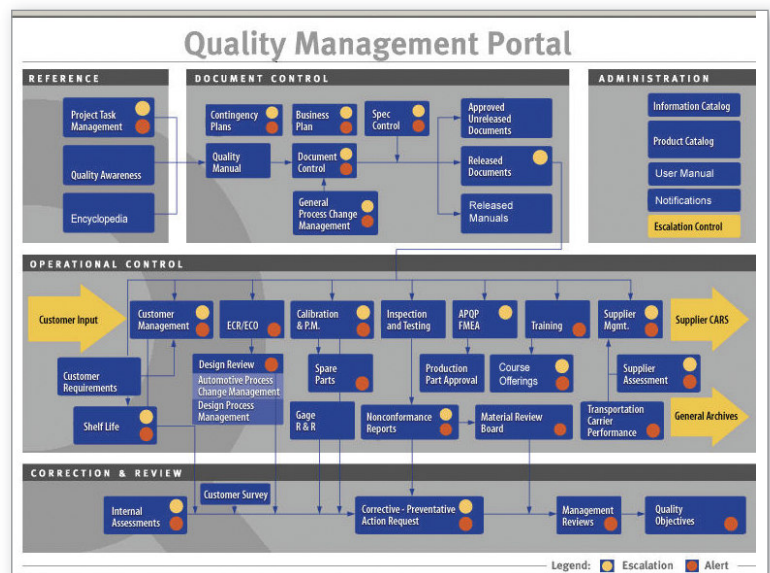

QSi System for Occupational Health and Safety (BSI OHSAS 18001:1999)

Designed specifically to meet the requirements for BSI OHSAS 18001:1999, as well as governmental health and safety requirements, this software helps you achieve the goals of this important standard: minimizing risk to employees and enhancing your organization's image in the community and in the marketplace. In addition to the core functionality found in the QSi System for Quality Management, the following functions are also included:

- Accident and Incident Reporting
- Chemical and Risk Assessment
- Monitoring and Test Records
- Claims Management
- OH&S Policy Manual
- Legal Register
- Emergency Preparedness
- MSDS/HAZMAT

QSi System for FDA Document Control and CAPA (21 CFR Part 11)

The QSi System for FDA Document Control and CAPA is architected for companies who must meet the requirements of FDA 21 CFR Part 11. Special secure-signature technology has been added for all document reviewers and approvers. Versions and draft Documents automatically provide an audit trail that documents the time-sequenced development and modification of documents. Organizations can develop custom formats to satisfy all their needs and customer requirements.

QSi Reports

Designed to satisfy the reporting requirements of ISO 9001:2000 and ISO/TS 16949:2002, QSi Reports' graphing and charting capabilities simplify the presentation of complex data and highlight important trends and exceptions using real time business information. The QSi Reports module comes with predefined reports with drill-down options. Charts and graphs can be viewed in a variety of formats with client software or web browser.
